

DA Series motor protector and safety cut-out

The DA Series is an evolution of the well proven Otter "Q" Series offering the same excellent over current and temperature protection for a wide range of 12 and 24 volt applications.

The DA is physically smaller than the Q but retains the unique Otter SNAP ACTION bimetal blade, ensuring a positive make and break switching action for enhanced contact life.

The DA also incorporates a series heater that gives added energy control to limit motor winding temperatures during potentially dangerous stall conditions.

The DA is available with a wide variety of terminal arrangements to provide flexibility of installation within the motor and is also designed for automated bowl feeding on production assembly lines.

TECHNICAL DATA

Voltage Range	9 to 30 Volts
Min. Switching Current*	5 Amps
Max. Switching Current*	25 Amps at 12 Volts
Max. Carry Current*	10 Amps at 24 Volts

*Measurements carried out in 20°C ambient

Specification : Please refer to the DA Series Manual or contact Otter Controls Sales Department.

Terminal Material : Brass or Nickel Silver

Terminal Options : Folds and Crops are available on request with options for Welding and Soldering

FEATURES

- Wide performance range
- Durable and robust construction
- Good energy regulation due to series heater
- High contact pressure across ambient temperature range
- Low ambient (-40°C) motor protection
- Meets all the requirements of 48 and 90 hour stall tests
- Terminal options
- Insulated covers, colour coded for customer identification
- Suitable for bowl feeding

STANDARD CONFIGURATION

DA CROSS SECTION

Scale 3:1
